Pharmacy prep OSCE Exam case 8

Door Note:

A doctor presents for a mutual patient. Address him as you would in regular practice and document your response if needed.

Time: You have 7 minutes to complete the station.

Reference: *H. pylori* treatment, chapter peptic ulcer

EXAM CASE 43

SP instructions:

- Opening statement: Hi my name is Dr. Mike. I am here regarding one of our mutual patient Azeez. He is been diagnosed with H.Pylori and I have written a prescription for him. I want your recommendation is it appropriate for patient?
- Everything is in patient profile.
- No antibiotic use within last 3 months.

Patient profile

Name: Peter Azeez Age: 55 year ,
Medical condition: Hypercholesteremia, GERD, Diabetes, *H. pylori*
Allergies: Penicillins
Medications:
Simvastatin 40 mg ----6 months
Metformin 500 mg tid----6 months
Rabeprazole 40mg-----3 months

New Rx:

Clarithromycin 500 mg bid + omeprazole 20 mg BID + Amoxicillin 1 g BID + Metronidazole 500 mg BID for 14 days

Solution

The pharmacist identified patient is allergic to penicillin.

Recommended to avoid amoxicillin containing regiments and this helps to avoid drug interactions of clarithromycin with simvastatin.

Rabeprazole 20 mg BID, Bismuth subsalicylate 2 tabs QID, metronidazole 500mg QID, tetracycline 500mg QID for 14 days
